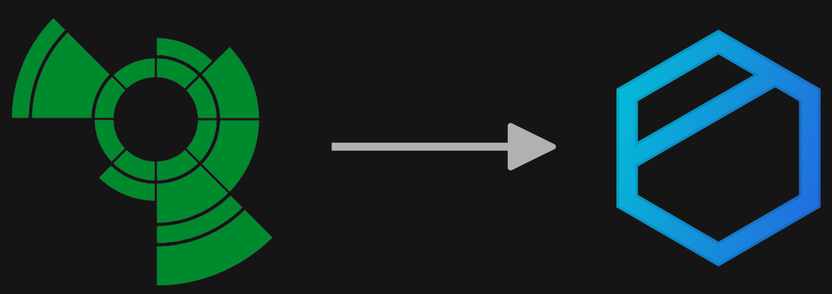
How to migrate files from Boxcryptor to Tresorit



Use Tresorit's end-to-end encrypted cloud storage seamlessly in your Finder. Tresorit Drive lets you sync and share data from your Finder directly, while the Tresorit app runs in the background.

This guide will walk you through the 3 easy steps to set up your Drive via the Tresorit app.

1. Download the Tresorit app
2. Migrate your data
3. Start using the Drive from your Finder

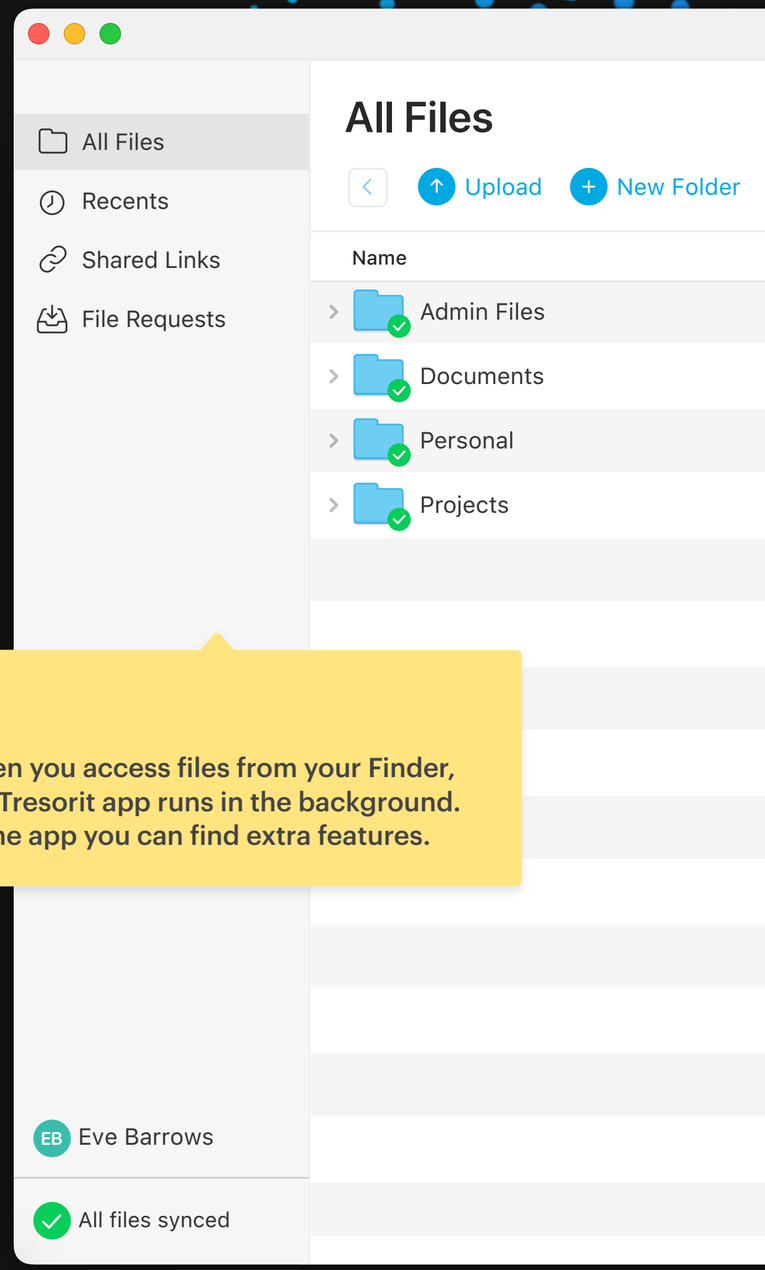
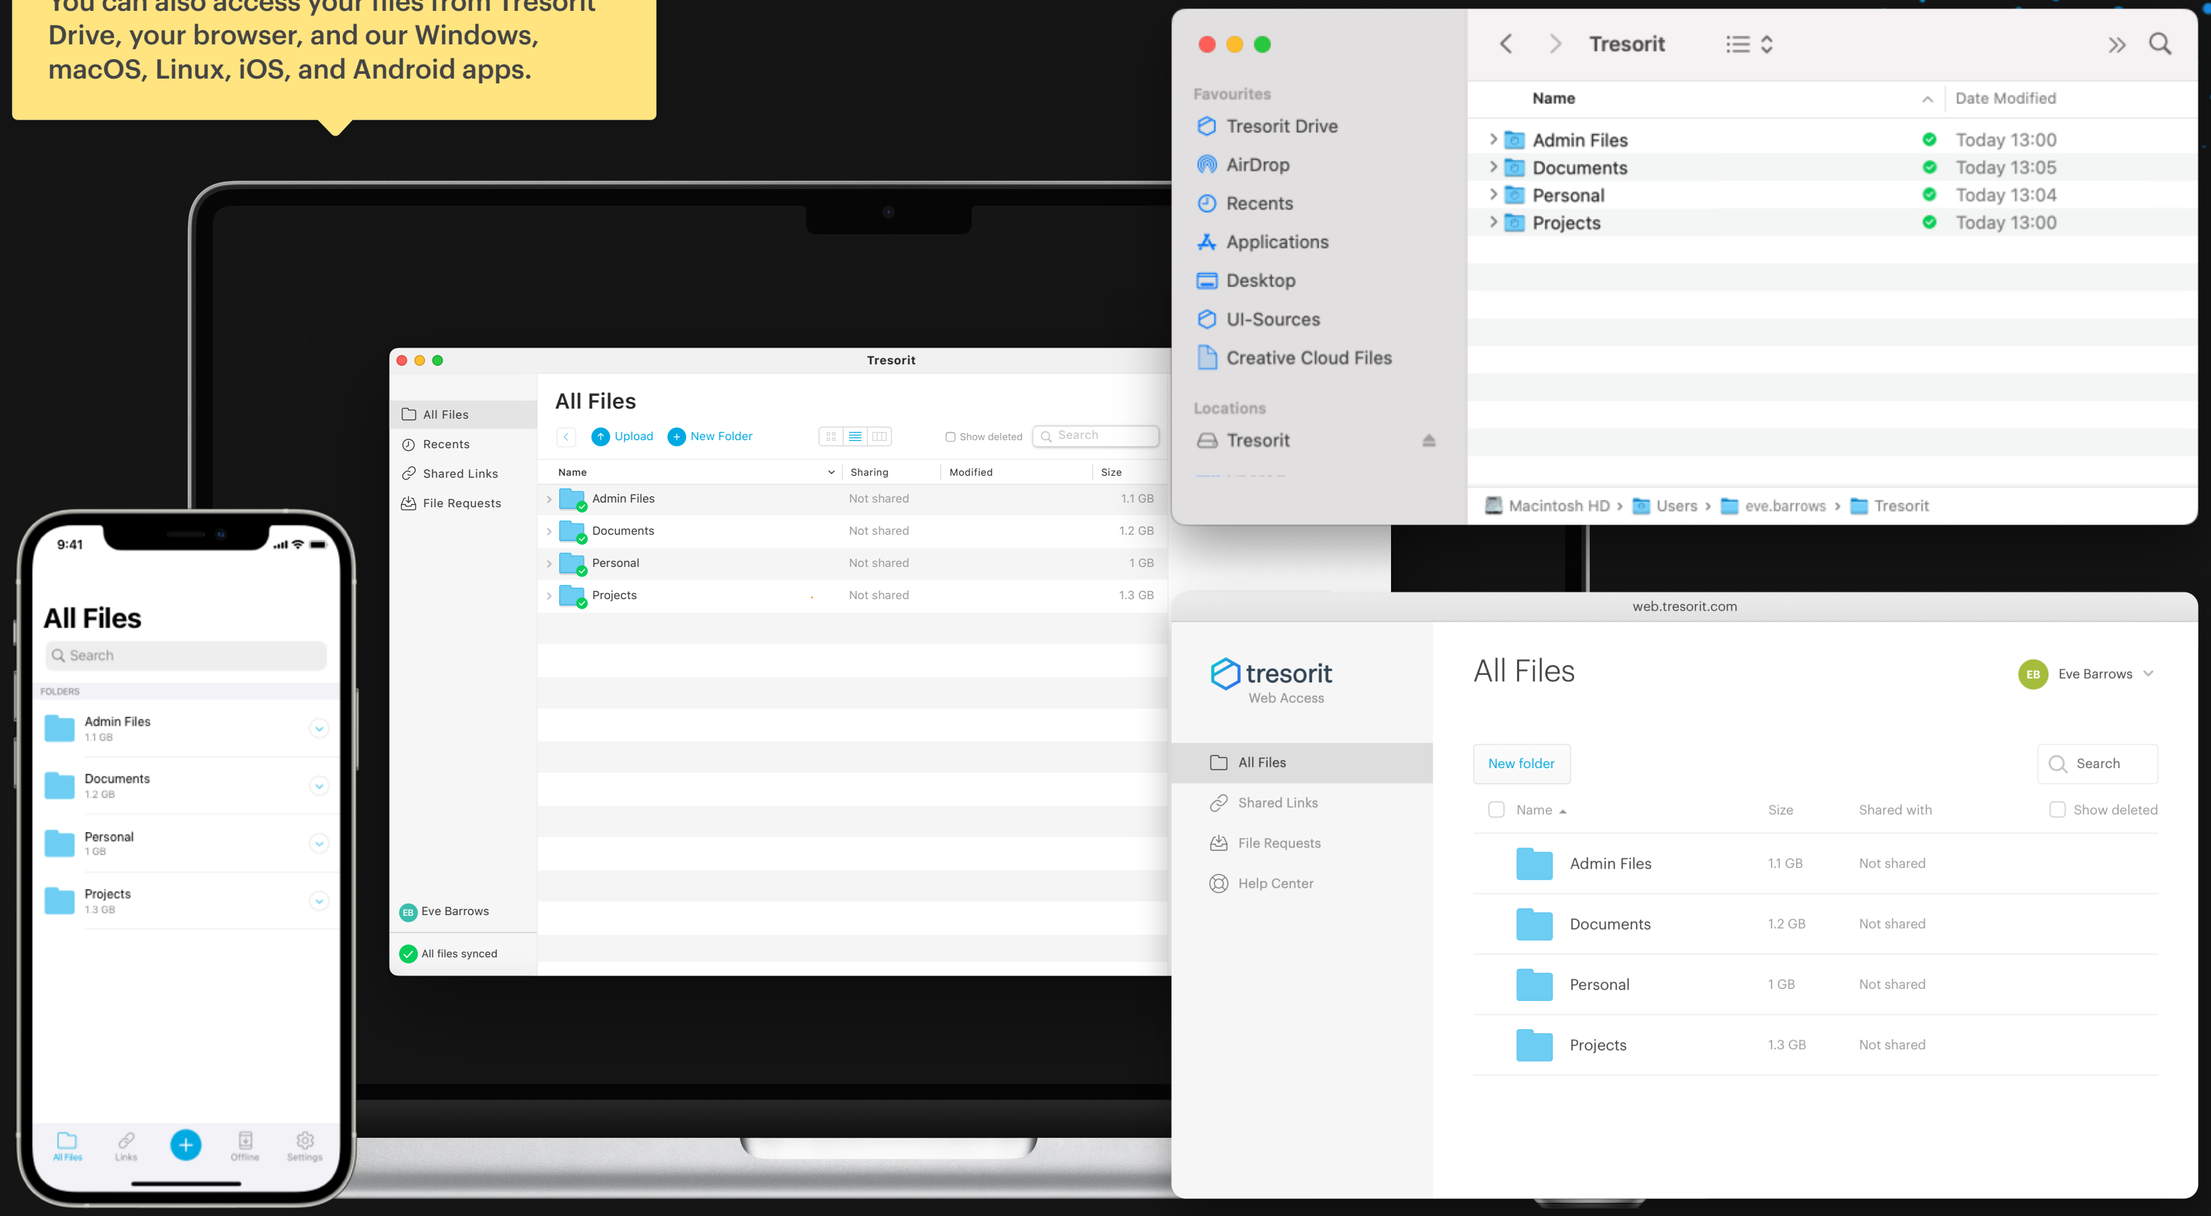
12

All the files you migrated appear in Tresorit's secure workspace. Access them from your Finder via Tresorit Drive and share your documents with anyone.



13

When you access files from your Finder, the Tresorit app runs in the background. In the app you can find extra features.

14


You can also access your files from Tresorit Drive, your browser, and our Windows, macOS, Linux, iOS, and Android apps.
